MORE THAN JUST FORKLIFTS

CORPORATE OVERVIEW

Whether you're in the market for new, used or rental equipment, we've got you covered with over 3000 machines in stock! We carry everything from forklifts, telehandlers, terminal tractors, reach stackers and container handlers to boom lifts and scissor lifts. We also provide our customers with after sales support that includes a large stock of replacement parts for all makes and models, as well as on site or in shop service to keep your equipment in optimal condition. This makes Lonestar Forklift your one stop shop for all your equipment needs. Contact our team today to see how we can provide you with a complete solution for your operation.

VISION STATEMENT

We strive to be the recognized choice for providing industry leading solutions based on an intimate understanding of each customer's goals and needs.

We will accomplish this by managing our resources responsibly and building interdependence throughout our organization. We are committed to providing our people with the resources they need to be successful while focusing on our guiding values:

LEADERSHIP - Our actions will reflect honesty, trust, respect and humility in all that we do.

CONTINUOUS IMPROVEMENT - We will continue to be better tomorrow than we are today.

TEAMWORK - We rely on each other to be successful, always looking for the third alternative.

ACCOUNTABILITY - We will be clear with our expectations and commit to holding each other accountable.

COMMUNITY, OUR ENVIRONMENT & SAFETY - We commit to be socially responsible by guiding our business decisions to deliver positive social and environmental returns.

**WHY CHOOSE
US AS YOUR
LIFT TRUCK
SUPPLIER?**

EIGHT LOCATIONS TO SERVE YOU

With eight facilities located in Austin, Dallas, Fort Worth, Houston, Longview, Midland, San Antonio, and Shreveport, Lonestar Forklift can provide solutions for a variety of businesses and applications throughout Texas.

EQUIPMENT SALES

Lonestar Forklift provides quality new equipment for a variety of job sites and applications across Texas. We also offer a wide selection of used equipment that features a variety of makes and models. Whether you're buying new or used, our team of equipment specialists will work with you to ensure that you're getting the perfect equipment for your needs.

RENTALS

When buying equipment isn't the best fit, look no further than our selection of rental equipment. Whether you need a forklift, a telehandler, or a boom lift for a short or long term rental, you can be sure we have a unit that is perfectly suited to your needs.

PARTS SUPPORT

Lonestar Forklift stocks thousands of high-demand parts every single day. Whether you're looking for filters, seal kits, brake components, or mast parts, we're your one stop shop for all of your parts needs in Texas. To minimize your down time, we also offer fast next-day shipping directly to your door or in-branch pickup at one of our eight locations.

SERVICE & REPAIR

Whether you're looking to bring your equipment to one of our eight locations for in-shop repairs or you need us to come to you, our factory-trained technicians are certified to work on any make and model of equipment. In addition to emergency service, we also offer total and planned maintenance programs that can be tailored to fit the specific needs of your operation.

TRAINING

With a wide selection of courses and training programs, Lonestar Forklift can help ensure that your staff are certified and educated in safety practices, equipment operation, and much more. Featuring a combination of blended learning, online training, and practical assessment options, our training programs can be adjusted to fit your schedule.

LONESTAR FORKLIFT

TYPES OF EQUIPMENT

Forklifts

We offer a wide selection of new forklifts for various applications, with capacities ranging from 3,000 lbs. to a massive 143,000 lbs. Whether you're looking for an electric, narrow aisle, LPG, or diesel model, you can be sure that we have a lift that's perfect for your needs.

Telehandlers

When you need a rugged and powerful telehandler to handle the most demanding jobs, Lonestar Forklift has you covered. Regardless of your application, we have a model that will help you get the job done. Our telehandler options include 2-WD, 4-WD and crab steering configurations with capacities ranging from 5,000 lbs to 20,000 lbs with lift heights of up to 70' from leading manufacturers such as **JLG**, **Genie**, **Xtreme** and **Manitou**.

Boom Lifts

In need of a boom lift for your construction site? Look no further than our lineup of **JLG** and **Genie** aerial work platforms. With rough-terrain and electric options available with lift heights of up to 85', we're certain to have a model that's perfect for your intended application.

Scissor Lifts

Whether you need a quiet electric or rugged rough-terrain model, you can be sure that Lonestar Forklift has a unit that fits your needs. We offer a variety of **JLG** and **Genie** aerial work platforms that can be used indoors, in elevator shafts, or on construction sites.

Container Handlers

When you're in need of an empty or loaded container handler, we have you covered. With our selection of **Konecranes** container handlers, we have a unit that will help you get the job done safely and efficiently every time. We also offer various attachments for each container handler such as single, double, and gantry spreaders to further boost their versatility.

Reach Stackers

If the job calls for moving heavy containers around a ship or train yard, look no further than our lineup of **Konecranes** reach stackers. Each model is designed for heavy loads and stacks between 3 and 6 containers high. We also offer a number of attachments such as telescopic spreaders, industrial tool carriers for connecting tools, and a hydraulic steel slab unit that pairs with lifting jaws. This ensures that we have a model and attachment for all of your intermodal needs.

Yard Spotters

If you're in the market for a new yard spotter, Lonestar Forklift is here to help. With our selection of powerful and easy to maintain **TICO** terminal tractors, we'll help you find the perfect model for your intended application.

Truck Mounted Forklift

Truck mounted forklifts are a great addition to any industrial or agricultural site when you don't have a loading dock. With the ability to mount and unmount from a truck in less than 60 seconds, you'll be able to get more done in less time. The extended boom also allows you to unload a truck bed or trailer from one side.

LONESTAR FORKLIFT

OPERATOR TRAINING

Safe, efficient operation of equipment is crucial to the success of any operation. Regardless of the application, it's imperative that employees and operators are trained in the best safety practices for all aspects of their job to keep incidents to an absolute minimum. To accomplish this training, Lonestar Forklift provides one of the most extensive selections of classes and training formats in the country. From physical safety and First Aid, to specialized job skills involving driving, excavating, training and managing others, we're here for all of your training requirements. Our courses are also designed to adhere to all relevant ANSI & OSHA standards.

Why Book Training with Lonestar Forklift?

- **Training Options** - In class, online, or blended learning allows you to choose an option that best suits your schedule and needs.
- **Industry & Safety Experts** - Our safety trainers have the experience and expertise required to serve a large variety of industries and applications.
- **Convenience** - Learn when and where it works best for you. Many courses can also be taken at your own pace, allowing you to learn at a rate that's comfortable for you.
- **Speed** - Most courses can be completed in only 60-120 minutes! This enables you to get back to work in less time than other training options.
- **Easy Management** - Receive reminders for staff re-evaluations so you can plan for training in advance.
- **Extensive Course Catalog** - Choose from 200+ courses on a variety of topics including safety, equipment operation, first aid, and much more.

RENTALS

When buying equipment isn't the ideal fit for your needs, our selection of rental equipment can provide the perfect solution. Our rental options offer fixed monthly costs that can be written off as an operating expense, allowing you to operate on a consistent budget. Furthermore, our rental fleet is one of the youngest in the industry. This ensures that each of our rental units have low operating hours and modern safety features.

Our equipment will provide you with a high degree of uptime, safety, and overall satisfaction.

Call or visit your local Lonestar Forklift branch for a quote on short-term or long-term rental.

Our rental inventory includes forklifts with capacities ranging from 3,000lbs to 143,000 lbs, telehandlers that can reach up to 70' and boom lifts with a lift height of 30' to 85'. Whether you're looking for rental equipment for construction, forestry, industrial, or other applications, we can offer a wide range of rental equipment for prompt delivery.

USED EQUIPMENT

Featuring a wide selection of quality used equipment from a variety of manufacturers, Lonestar Forklift is your destination for used equipment. Whether you're looking for a used forklift, scissor lift, boom lift, telehandler or even a container handler, we've got you covered. Each unit in our used equipment fleet is work ready and prepared to tackle the demands of your job site. If we don't have your exact specifications in stock, our knowledgeable equipment experts can source a unit for you from our extensive network of pre-owned equipment.

Why Buy Used Equipment from Lonestar Forklift?

- **Extensive Selection** – Featuring hundreds of units from a variety of manufacturers, our used equipment inventory can serve the demands of various industries and applications.
- **Support from Equipment Experts** - Our used equipment experts are well-versed in a variety of makes and models. Whether you're working in construction, forestry, mining, warehousing, or intermodal applications, our team will help you find the perfect unit for your needs.
- **Shipped to Your Location** - We can arrange the shipping of your newly purchased equipment straight to your location. This eliminates the headache of getting it to your job site and lets you keep your focus on the job.
- **Flexible Financing** - Our financing specialists are dedicated to creating a payment plan that fits your needs and budget.

These factors combine to make Lonestar Forklift your one stop shop for all of your used equipment needs. We're committed to providing you with quality equipment that is ready to perform whenever you need it. Contact our used equipment team today!

PARTS SUPPORT

With thousands of in-demand parts in stock and ready to ship, Lonestar Forklift is your one stop shop for lift truck parts, aerial lift parts, and yard truck parts. With OEM and aftermarket options available, we offer comprehensive parts support for a wide range of makes and models. Regardless of your equipment and application, you can be confident that we have the parts you need, when you need them. Contact our team today for a quote!

Why Buy Parts from Lonestar Forklift?

Comprehensive Support from Industry Experts

At Lonestar Forklift, we understand that every second of downtime results in financial loss and reduced productivity. We work hard to keep your downtime to an absolute minimum, letting you get back to work as soon as possible. After you've given us the make, model, and serial number of your unit, we'll do the rest. With access to the most recent parts manuals for a wide selection of makes and models, you can be sure that you're getting the correct part every time.

Parts in Stock & Ready to Ship

Thousands of high-demand parts in stock across our eight locations allows us to offer fast next-day shipping straight to your door for most orders. If direct shipping isn't your preferred method, we can also have your order reserved for pickup at one of our eight facilities located in Austin, Dallas, Fort Worth, Houston, Longview, Midland, San Antonio, and Shreveport.

Quality Parts & Industry Leading Warranties

Each part in our inventory is extensively tested and built to last. This ensures that they can handle even the most demanding tasks on your job site, performing when you need them most. In addition to their quality, each part is backed by an industry-leading warranty. This allows you to operate with confidence and peace of mind, knowing that you're using quality parts backed by quality coverage. Some parts may not be included, so speak to our parts experts for more details.

MAINTENANCE PROGRAMS

As a leading forklift, telehandler and aerial lift dealer in North America, Lonestar Forklift is proud to offer service and support for a wide range of equipment. Whether you're looking to set up a planned maintenance program, or your equipment is in need of emergency repairs, our team of knowledgeable experts are here to help. We offer comprehensive equipment repairs on most makes and models of equipment throughout Texas.

Maintenance Programs

Lonestar Forklift offers a variety of maintenance programs that can be adjusted to your specific needs. Whether you're looking for standard planned maintenance with set intervals and costs or annual inspection programs, we've got you covered. In addition to our comprehensive preventative maintenance, we also provide detailed tracking, cost reporting, technical support, OEM warranty support for various manufacturers, and custom invoicing. This allows us to meet the needs and requirements of various job sites.

Planned Maintenance - Our planned maintenance programs ensure that your equipment is regularly serviced to prevent performance issues and breakdowns. We perform an in-depth system analysis that determines the maintenance intervals for your application. This system analysis also alerts you to any major repairs that will need to be performed in the future, allowing you to budget for these expenses. A planned maintenance program allows you to operate with peace of mind and control your downtime.

Total Maintenance - Lonestar Forklift offers hassle-free equipment repairs. Total maintenance plans cover all aspects of the equipment excluding abuse and wear items, allowing you to reduce costs throughout the term of the plan. This ensures that there are no surprise expenses for major repairs as they're included in the cost. In addition to cost savings, each service is performed by one of our highly trained Lonestar Forklift mechanics.

TECHNICAL SUPPORT SYSTEM

Lonestar Forklift is an industry leader in service support for its customers

- Technicians in the shop and in the field in each Lonestar Forklift location
- Each field technician is equipped with over \$5,000 in specialty tooling
- Technicians are factory trained
- Technicians are relocated to different Lonestar Forklift branches as needed. If a region has a need for more mechanics, we can transfer technicians to required branches on a short-term basis.
 - Technical support center
 - Supports all of the technicians both in-house and field
 - Direct lines to manufacturers
 - Detailed knowledge of product lines
- Service is available 24 hours a day 7 days a week for any make or model of machine
- Parts are available 24 hours a day 7 days a week for any make or model of machine
- On-site operator training is available

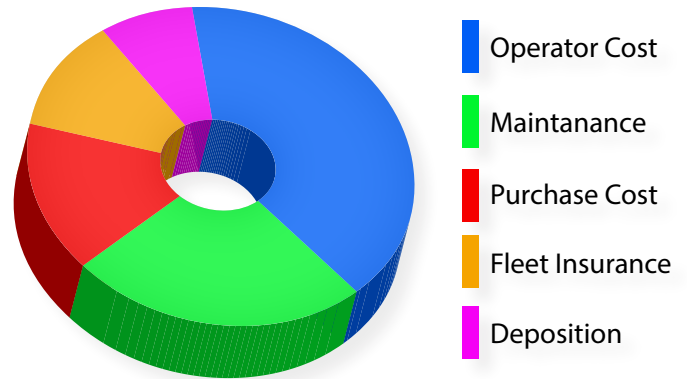

Latest Technologies

- With proprietary web-based service applications, smart phones, laptops, air cards, GPS equipped service trucks and specialized diagnostic equipment, we have the ability to provide electronic copies of all work completed on the spot. We can also look up machine service histories prior to beginning all repairs, as well as performing detailed and customized analysis on maintenance trends and costs.

FLEET MANAGEMENT

Estimates show that only 15-20% of total equipment operation costs are tied to the initial purchase price of the unit itself. Maintenance, downtime, crisis management, fuel costs, damages, and other intangible costs account for the other 80-85%, making it important to organize and coordinate these elements. It is for this reason that Lonestar Forklift offers a comprehensive customized fleet management system to support your business in strategic and economic decisions regarding your fleet of equipment. Contact us today for a free consultation!

The Initial Inspection

Before implementing a fleet management program, our team starts with a detailed inspection at no cost and no commitment. This helps us to understand the needs for your site and address any specific challenges you may be facing.

Fleet Audit

Next, we assess your entire fleet. This helps us identify any surplus or underutilized equipment. We then assess the life cycle costs of each machine in your fleet to determine their optimal turn over time.

Recommendations

Once our inspection and audit has been completed, we provide you with a list of recommendations that covers equipment specifications, turn over time for outdated equipment, and service/training schedules. Equipment specifications cover everything from mast and fork profiles to tire options and recommended fuel types for each unit in your fleet. We also provide a list of safety recommendations that helps to ensure the safety of your employees, your equipment, and the products you move.

Implementation

Once these recommendations have been made, our team works with you to implement each suggested change. Cost control, data management, ease of ownership services, and fleet management cost reporting are all examples of the services we can implement for your business.

FLEET MANAGEMENT

When you opt into one of our fleet management systems, you can rely on our years of experience while you focus on the day to day operations of your business. We're here to assist in making responsible long-term decisions and providing ease of ownership for all of your equipment. When you utilize our fleet management systems, you'll see the following benefits:

Optimum Turnover Time

Our fleet management software works to determine the optimum turnover time for each unit in your fleet. By determining this period of time for your unit, you'll be able to replace your unit before maintenance and intangible costs rise above what you would be spending on newer equipment.

Increased Uptime

We increase your uptime by providing total or preventative maintenance programs based on your needs. This reduces the chance of equipment breakdowns and virtually eliminates major component repairs.

Monetary Savings

We streamline your equipment costs, resulting in one monthly payment that is easy to track and account for. This fixed operating expense also helps you avoid any major capital outlays or surprises, keeping your budget stable and consistent.

Enhanced Productivity

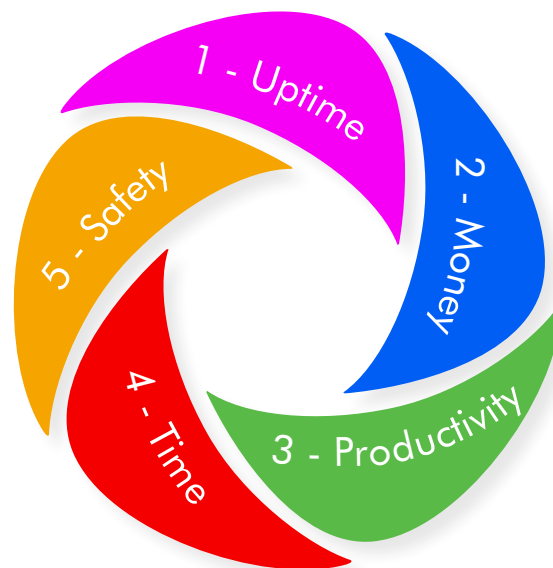

Our fleet management programs enhance your productivity by offering additional rental programs to assist with peak seasons. Our team will ensure that your downtime is kept to an absolute minimum, providing loaner units while your unit is down for maintenance or repairs.

More Time

We save you time by reducing the amount of supervision and monitoring you need to perform on your equipment. Our fleet management software provides you with complete data management, accounting services, and allows you to view all equipment at multiple locations through the push of a button.

Increased Safety

By replacing old and outdated equipment with the latest units, we increase the safety of your site. Newer equipment often features enhanced safety features and a more streamlined design that increases visibility and reduces the chance of incidents. This updated equipment also allows you to remain compliant with changing emissions standards.

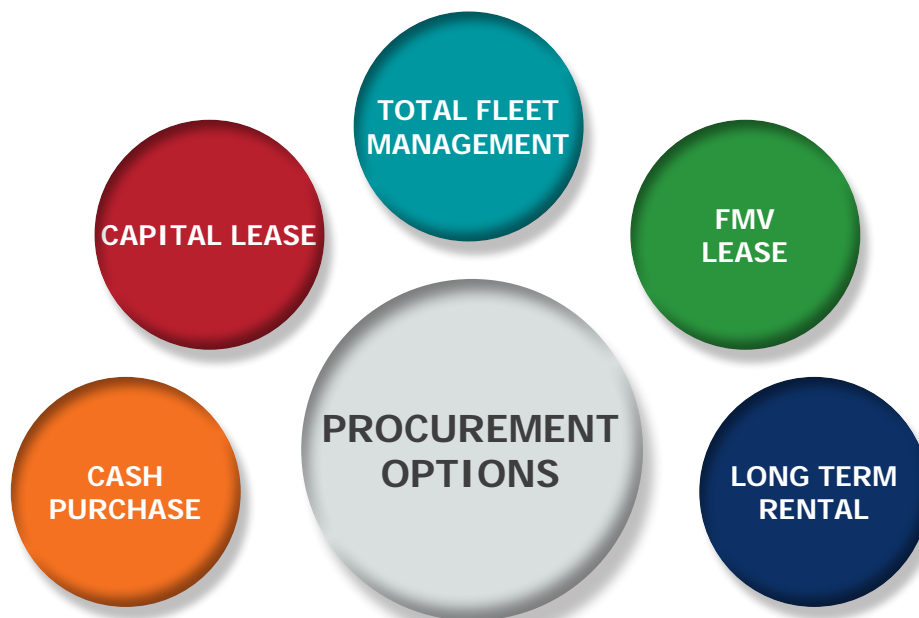

NEW EQUIPMENT

Few equipment dealers can boast the selection of quality makes and models we offer. Whether you're working in construction, forestry, industrial, warehousing, or intermodal, you can be sure that we have several options designed for the demands of your application. Our team of industry and equipment experts will work with you to evaluate your equipment needs in order to select the best possible solution. This will ensure that your new purchase is an efficient, productive, and safe addition to your fleet.

Lonestar Forklift Offers Many Different Procurement Options to Suit Your Specific Business Needs

Lonestar Forklift has specialized in selling new forklifts, telehandlers, container handlers, aerial lifts, and yard trucks for over 25 years. This experience has allowed us to grow our business and offer a comprehensive list of services to our customers including sales, service, parts, and training. These services allow us to meet the growing and changing demands of every customer, providing solutions for you regardless of your equipment and application.

We are proud to be the #1 Hyundai forklift dealer in North America. In addition to Hyundai forklifts, we offer a selection of leading brands including BYD, Konecranes, TICO, Manitou, JLG, and more. We carry every type of new forklift you could need for your application. Whether you're looking for an electric, LPG, diesel, pneumatic, cushion, rough terrain, or truck-mounted model, we've got you covered. If you are in need of something other than a forklift, we have additional equipment that supports all industries and applications.

HYUNDAI

Founded in 1972, Hyundai Heavy Industries has over 35 years of expertise across various industries. Starting in shipbuilding, they quickly branched out to offshore engineering, industrial plants, warehousing, and the construction industry. They continue to serve these industries today with their reliable, quality equipment.

When you're buying a Hyundai forklift, you're buying a product that has been honed through years of hard work, testing, and success. You're also getting a forklift that combines industry-leading automotive and earth moving technology with ship-grade steel. This results in a powerful, sturdy unit with an intelligent and easy to maintain design. Whether you need a cushion tire electric forklift, an LPG pneumatic forklift, or a rugged diesel forklift, Hyundai has a model for every type of application. It is this legacy of quality and versatility that makes Lonestar Forklift proud to be the #1 Hyundai forklift dealer in North America.

LONESTAR FORKLIFT

MANITOU

With over 60 years of experience, Manitou is a world leading manufacturer of rough terrain forklifts, telehandlers, and truck-mounted forklifts. Founded in 1957, Manitou has developed their equipment through years of user feedback and refined designs. Their focus on safety, reliable performance, serviceability, and operator comfort has established them as one of the most popular brands in North America.

In addition to quality, Manitou offers a wide selection of equipment for a variety of applications. Whether you're in need of a rough terrain forklift for work on demanding mining sites, or a telehandler for your construction needs, you can be sure Manitou has a unit that will get the job done. They also offer a number of OEM attachments such as buckets, clamps, and forks to further tailor your unit to your specific needs. When you need a reliable, easy to maintain, and versatile forklift or telehandler, Manitou has you covered.

 **MANITOU**
HANDLING YOUR WORLD

KONECRANES

As a leader in lift truck technology, Lonestar Forklift is proud to support the Konecranes lift truck lineup throughout Texas. Heavy-duty Konecranes lift trucks are ideal for use in heavy lifting industries like container ports and terminals, steel factories, mining facilities, building material warehouses, and shipyards.

With over 20 years of industry knowledge and hundreds of customers worldwide, Konecranes knows heavy-duty equipment. They are fully committed to developing products that are intelligent, user-friendly, and powerful. Their lift truck lineup offers capacities of up to 143,000 lbs, while their container handlers and reach stackers have capacities of up to 99,200 lbs and can stack between 5-8 containers high, depending on the model. They are also committed to helping ports reduce emissions, as shown through their development of the first hybrid reach stacker in the world. When you depend on your equipment to perform a continuous stream of heavy lifting, look no further than Konecranes.

KONECRANES®

LONESTAR FORKLIFT

CARER

Founded in 1976, Carer has been a leading manufacturer of high capacity electric forklifts for over 40 years. Considered by many to be pioneers of the high-capacity electric forklift, Carer offers the most powerful all-electric lineup in the industry. Their continued investment in research and innovation serves as the foundation for design and development of all Carer electric forklifts. This ensures that you're getting a powerful, reliable, and versatile lift that can handle a wide variety of jobs.

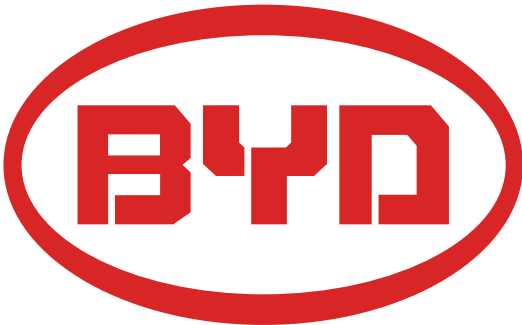

Carer electric forklifts also feature large batteries that give them an extended run time compared to other models in the industry. This greatly reduces the frequency and duration of charge time, allowing you to get more done between each charge. In addition to powerful batteries, Carer electric forklifts also feature a compact design that allows them to be used in tight spaces without issue. Above all else, Carer offers the most powerful electric forklifts in the industry. Featuring models with lift capacities between 5,500 and 40,000 lbs, you can lift any type of material with ease.

BYD

After spending years as a leading manufacturer for batteries, BYD set out to design a series of electric forklifts powered by this leading technology. Their revolutionary, environmentally-friendly iron-phosphate batteries run longer and charge faster than a traditional battery. They are also completely maintenance free, eliminating the need to halt operations for watering and battery equalization. Each BYD electric forklift comes as a complete package; truck, battery, and charger, all in one.

At the heart of each unit is a waterproof sealed battery pack that allows them to operate in any condition, rain or shine. Whether you're lifting in a hot and stuffy warehouse, a wet lumber yard, or a cold storage room - you can be confident that your BYD electric forklift will deliver.

LONESTAR FORKLIFT

JLG

Lonestar Forklift is proud to offer rentals, sales, and support for the JLG equipment lineup in Texas. This includes a broad range of JLG boom lifts and JLG scissor lifts, along with the rugged JLG telehandler. JLG Industries provides products that deliver industry leading safety, versatility, and quality without sacrificing the performance you need to get the job done.

JLG Industries works hard so you don't have to, producing lift equipment that is easy to maintain and service. From all-steel swing-out component trays, to more accessible lift cylinders and remote diagnostics, you'll spend more time on the job and less time in the shop.

With an ever growing demand for green solutions, JLG Industries produces a lineup of boom lifts and telehandlers with an optional Tier 4 Final diesel engine. Greener options for boom lifts and scissor lifts include diesel hybrid and electric motors. With these options, you'll comply with environmental regulations without sacrificing power or performance.

GENIE

Lonestar Forklift is proud to offer Genie sales and support in Texas. We carry a full range of Genie equipment including boom lifts, scissor lifts, and telehandlers. Genie lifts are popular in many different industries, due to their considerable reach capabilities, they can be found in industrial yards, distribution facilities, warehouses, and construction sites.

Genie Industries strives to solve worksite challenges. Whether you're reaching from the ground floor, hauling material across muddy terrain, or maneuvering a boom around difficult architecture, this highly responsive and well-designed equipment gets the job done.

A TEREX BRAND

LONESTAR FORKLIFT

NAVIGATOR

Chrisman Manufacturing has been a leading manufacturer of truck-mounted forklifts since 1987. From their first forklifts all the way to their current Navigator series, their goal has always been complete customer satisfaction. Thousands of hours of research and testing have gone into the development of the Navigator series alongside feedback from operators, mechanics, and business owners. This ensures that each Navigator forklift is reliable, user friendly, and practical for many applications. The optional "Nav-Reach" system allows you to load/unload from one side of the truck making them great for confined spaces. Whether you're moving sod and fertilizer or hauling lumber across a job site, we have a Navigator forklift that will get the job done safely and efficiently. Every Navigator truck-mounted forklift comes standard with rugged all-terrain tires and is available in capacities ranging from 4,000 to 6,500 lbs. Lonestar Forklift provides an overnight maintenance guarantee for Navigator truck mounted forklifts. Drop off your machine at the end of the day and we will have it serviced and ready for you the next morning.

TICO

Founded in 1975, TICO manufactured over 1,200 terminal tractors before entering the North American market in 2008. Unable to find a durable or reliable option for terminal tractors in the market, TICO decided to manufacture their own. Bringing years of operator experience to the table, they sought to develop a product that was not only powerful and reliable, but also comfortable and easy to maintain. It is this focus on both the job and the operator that has made TICO the leading innovator in the terminal tractor market. Examples of this innovation can be seen in the electric boom hoist and vibration cancelling technology on each model, ensuring that each load is delivered efficiently and safely.

TICO is constantly in contact with owners and operators, compiling feedback for future models to ensure that they remain at the top of the market. When you're buying a TICO terminal tractor, you're buying a product that has been designed by operators, for operators. As a result, you can expect that each model is durable, efficient, and comfortable to operate. TICO yard spotters also provide the best value in the industry by making maintenance easier than any competitor. This minimizes downtime and maximizes productivity by keeping the unit running and on the job. With DOT Certified and non-DOT Certified options, Lonestar Forklift can help you find the perfect TICO yard spotter for your needs.

TICO

LONESTAR FORKLIFT

POWERBOSS

Since 1985, Powerboss has been a leading manufacturer of sweepers, scrubbers, and sweeper scrubber hybrid units. Their innovative designs deliver reliable, cost-effective performance for a variety of applications and facilities. Whether you're needing to clean a dusty warehouse, clean the floors of a retail store, or sanitize a food preparation facility, Powerboss has a sweeper or scrubber that can get the job done quickly and effectively.

Innovative Technology & Quality - Powerboss has developed the Aqua Stop System, maintenance-free gel batteries, on-board chargers, and simplified controls. All of these features combine to enhance productivity, comfort, and performance, ensuring a deep clean in less time.

Environmentally Friendly - In addition to performance and safety, Powerboss sweeper scrubbers are designed to conserve water and chemicals through the Aqua Stop System. This feature ensures that water and chemicals are only distributed beneath the scrubbing brush, not to the sides. This cuts water and chemical consumption by nearly 50%, allowing you to reduce your environmental footprint while reducing chemical costs over time.

PowerBoss
The Power of Clean

BIG JOE

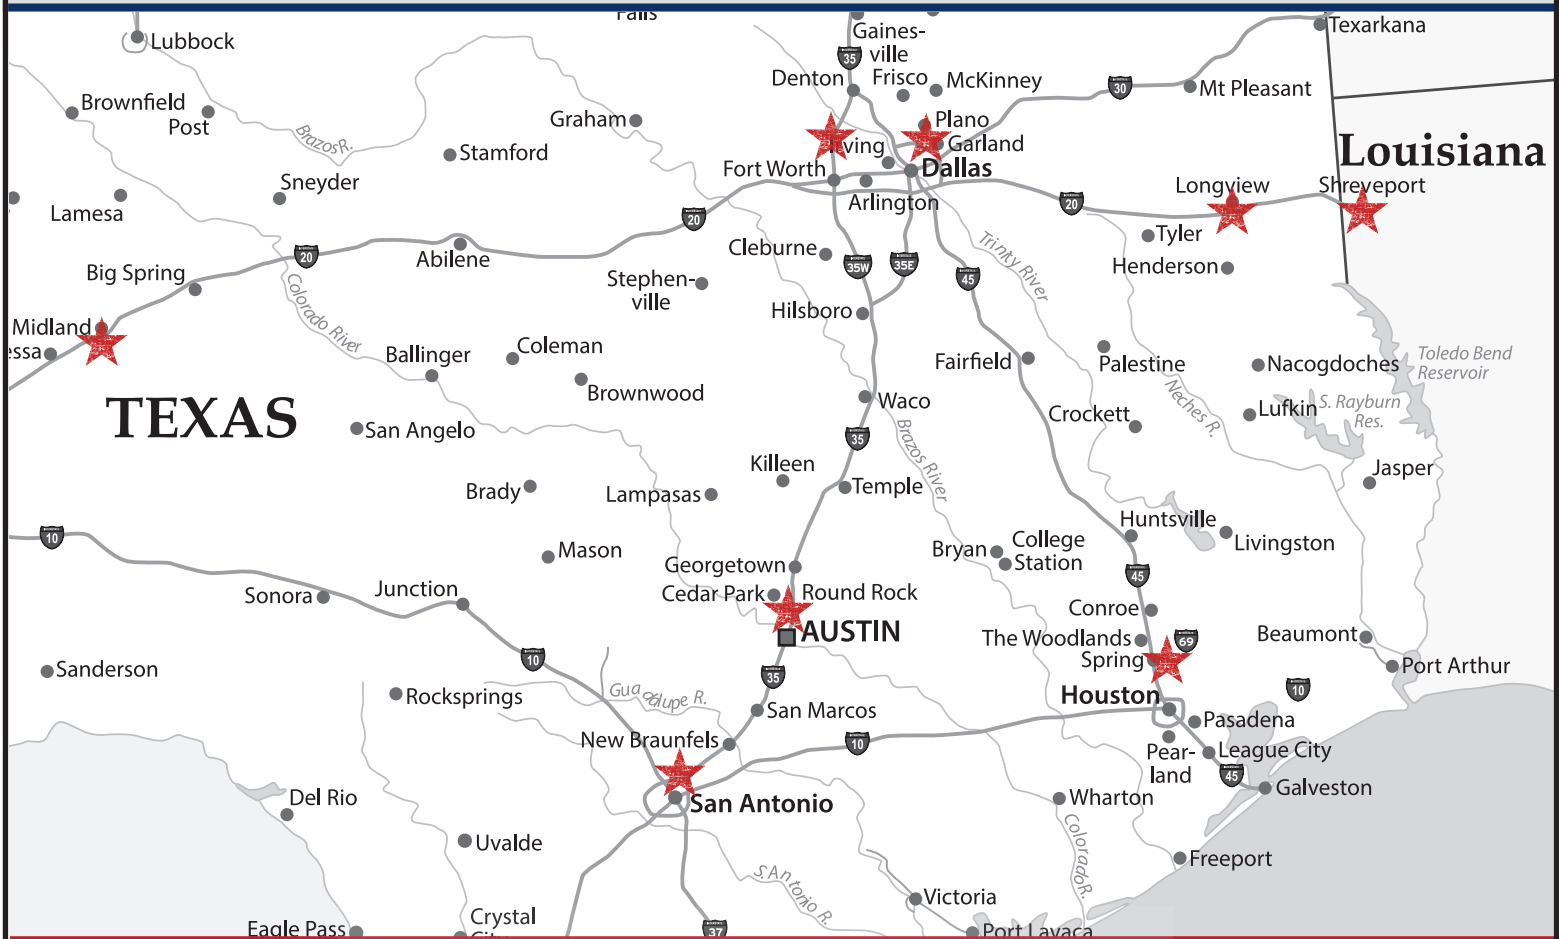

Big Joe's E30 electric pallet jack has a capacity of 3,000 lbs, weighs just 450 lbs and has the narrowest chassis width in its class. The E30 uses a state of the art permanent magnet drive motor to deliver up to 4.5 hours of continuous operation on a single charge. An excellent choice for use on delivery routes or in retail aisles. Upgrade from a manual pallet jack to an electric pallet jack to reduce worker fatigue and improve productivity.

Big Joe electric pallet jacks have been the standard of quality for over 60 years in factories, warehouses and store-rooms across the USA and around the world. The Big Joe E30 has been designed to perform anywhere a manual pallet truck can operate. When using these machines, operators have fully powered travel, lift and braking which eliminates the pulling, pushing, twisting, stretching and pumping required in the use and control of manual equipment. Using the bolt on load backrest to secure loads during travel can reduce product damage and potential hazards to personnel. Load back rests can be outfitted with tool trays, skid bars, lights, and other accessories.

Beyond just safety benefits, upgrading from manual to powered equipment will enable your workers to get more work done per shift. This can translate to less time devoted to repeat tasks, shorter delivery stops and more time to devote to higher value activities. While the infrequent transport of lightweight loads across short distances can be accomplished without the need of power, 2X worker productivity can often be attained in many repetitive tasks where load weights exceed 1,000 lbs or 100' of transit.
